

Eight Lecture

Greenfield, Mergers and Globalization

Regimes of differential accumulation (revision)

- Breadth (size) and depth (elemental power)
- External breadth: green-field
- Internal breadth: mergers and acquisitions
- External depth: stagflation
- Internal depth: cost cutting
- Paths of differential accumulation: corporate strategies vs. regimes

External breadth: green-field

- Size of firms, number of firms
- The double edged sword of economic growth

Internal breadth: mergers and acquisitions

- Buy-to-build ratio
- One of the “ten mysteries of finance”
- Marshall’s economies of scale?
- Coase’s transaction costs?
- Corporate size: efficiency or differential profit?
- Merger as a “disciplinary force”?

Breaking the envelope

- The merger waves: monopoly, oligopoly, conglomerate, global
- Tobin’s Q – are investors out of their mind?
- “Eating the goose that lays the golden eggs”
- Depleting the pool of takeover targets
- Merger as a social transformation

Amalgamation and globalization

- Globalization cycles
- The Unholy Trinity: state sovereignty, capital mobility, monetary stability
- Gross and net flows
- Capital mobility and ownership
- Foreign investment: efficiency or power?

Earnings

$$\text{earnings} \equiv \text{employment} \times \frac{\text{earnings}}{\text{employment}}$$

$$\text{earnings} \equiv \text{employment} \times \text{earnings per employees}$$

$$\text{earnings} \equiv \text{breadth} \times \text{depth}$$

Differential Earnings

$$\text{earnings}_D \equiv \text{employment}_D \times \text{earnings per employees}_D$$

$$\frac{\text{earnings}_{DK}}{\text{earnings}_A} \equiv \frac{\text{employment}_{DK}}{\text{employment}_A} \times \frac{\text{earnings per employees}_{DK}}{\text{earnings per employee}_A}$$

FIGURE 4 G7 Private Investment Flows (% of gross fixed capital formation)

NOTE: Series are shown as 3-year moving averages. Flows comprise direct and portfolio investment. Gross flows are computed as the sum of inflows and outflows. Net flows are computed separately for each country as the difference between inflow and outflow, and then converted into absolute values and aggregated. Each series denotes the ratio of overall G7 flows to overall G7 gross fixed capital formation, both in \$US. Data prior to 1977 pertain to Canada, Italy, UK and the US only.
