

Capital and Power

In the Global Political Economy

York University, Political Science 4291(0.3)
Fall, September 7 – December 6, 2005, Tuesday 11:30-2:30

Course Director: Jonathan Nitzan

Office: S650 · Office hours: Tuesday 9:30-10:30, or by appointment
Voice: 736-2100 (ext. 88822) · E-mail: nitzan@yorku.ca · Website: www.bnarchives.net

OVERVIEW

DESCRIPTION

What is capital? Is it a material thing or a social relation? What is political about it and how does it relate to power? What is the role of capital in the broader global political economy? The seminar examines such questions theoretically and historically. The first part explores basic conceptions of capital. It begins by studying three approaches to capital: one based on utility, a second based on labour value and a third based on power. The discussion then broadens to examine these three approaches in relation to technology, the corporation and the state. The second part of the seminar deals with transformations of capital. This part introduces the twin concepts of dominant capital and differential accumulation. Using these concepts, the seminar explores the historical processes of corporate mergers, globalization, stagflation, imperialism and the new wars of the twenty-first century. (There could be some minor deviations from the course schedule and readings as we go along.)

FORMAT

Lectures and class discussion.

EVALUATION

The course grade comprises the following items:

	Weight	Maximum length	Due Date
Participation	10%	---	
Research Exercise 1	15%	---	October 25
Research Exercise 2	25%	---	November 15
Term Paper	50%	4,000 words	December 15

General. All work must be typed and should not exceed the specified word limit. Late submissions will be accepted only with a valid documented reason (medical or family misfortune); otherwise, they will be subject to a penalty of 10% per day.

Participation (10%). You are allowed to miss 2 sessions without reason. Every additional no-show reduces your attendance grade by 2%.

Research Exercises (15% and 25%). The two research exercises are to be done in pairs. The purpose of the exercises is threefold: (a) to familiarize you with some of the data sources available for the study of political economy; (b) to give you hands-on experience in obtaining, manipulating and interpreting empirical information; and (c) to make you appreciate the importance and limitations of facts.

Take Home Essay (50%). This essay is to be written individually. The purpose is for you to creatively combine theoretical discussion with empirical analysis.

TEXTS (AVAILABLE FROM THE BOOKSTORE)

Required

- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press.
- Heilbroner, Robert. 1992. *Twenty-First Century Capitalism*. Toronto: Anansi.

Optional

- Keen, Steve. 2001. *Debunking Economics. The Naked Emperor of the Social Sciences*. Annandale and London: Pluto Press Australia and Zed Books.
- Nitzan, Jonathan, and Shimshon Bichler. 2002. *The Global Political Economy of Israel*. London: Pluto Press.
- Galbraith, John Kenneth. 1967. *The New Industrial State*. Boston: Houghton Mifflin Company.
- Mumford, Lewis. 1967. *The Myth of the Machine. Technics and Human Development*. New York: Harcourt, Brace & World, Inc.

SCHEDULE

1. *Sep 13:* Introduction and Organization

Part I: Conceptions of Capital

2. *Sep 20:* Capital, Capitalism and Political Economy
3. *Sep 27:* Utility and Value: Neoclassical Capital
Oct 4: [No Class – Religious Holiday]
4. *Oct 11:* Labour and Value: Marxist Capital
5. *Oct 18:* Power and Value: Veblen's Capital
6. *Oct 25:* Technology and Power
7. *Nov 1:* The Corporation

Part II: Transformations of Capital

8. *Nov 8:* Capital *AS* Power: Dominant Capital and Differential Accumulation
9. *Nov 15:* Mergers and Globalization
10. *Nov 22:* Stagflation
11. *Nov 29:* Capital and State: Imperialism
12. *Dec 6:* New Imperialism or New Capitalism?

READINGS

The required readings are available from one of the following sources: (1) required textbook; (2) course kit; (3) York Library's 'eResources'; (4) specified URL.

1. Introduction and Organization

2. Capital, Capitalism and Political Economy

Required Readings

- Heilbroner, Robert. 1992. *Twenty-First Century Capitalism*. Toronto: Anansi. [required textbook; 118 pages]
- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press, 'Introduction' and Ch. 1: 'Politics and Economics,' pp. 1-32. [required textbook; 32 pages]
- Bichler, Shimshon, and Jonathan Nitzan. 2003. *Political Economy: Past and Future*. Mimeograph, Jerusalem and Tel Aviv. November, pp. 1-5. [<http://bnarchives.yorku.ca/64/>; 5 pages]

Optional Bibliography

- Dowd, Douglas. 2000. *Capitalism and Its Economics: A Critical History*. London and Sterling, Virginia: Pluto Press.

- Heilbroner, Robert. 1980. *The Worldly Philosophers. The Lives, Times, and Ideas of the Great Economic Thinkers*. Fifth ed. New York: Simon and Schuster.
- Huberman, Leo. 1936. [1961]. *Man's Worldly Goods. The Story of the Wealth of Nations*. New York: Monthly Review Press.

3. Utility and Value: Neoclassical Capital

Required Readings

- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press, Ch. 4: 'Neoclassical Political Economy,' pp. 77-99. [required textbook; 23 pages]
- Hunt, E.K. (1992) *History of Economic Thought. A Critical Perspective* (New York: HaperCollins Publishers), Ch. 11, 'Neoclassical Theories of the Firm and Income Distribution: The Writings of Marshall, Clark and Böhm-Bawerk'; Ch. 16, 'Annulment of the Myth of the Measurable Productivity of Capital: The Writings of Sraffa,' pp. 351-388; 527-548. [course kit; 60 pages]
- Nitzan, Jonathan, and Shimshon Bichler. 2000. Capital Accumulation: Breaking the Dualism of 'Economics' and 'Politics'. In *Global Political Economy: Contemporary Theories*, edited by R. Palan. New York and London: Routledge, pp. 67-88. [<http://bnarchives.yorku.ca/19/>; 22 pages]

Optional Bibliography

- Braudel, F. (1979) *The Wheels of Commerce. Civilization & Capitalism 15th-18th Century. Vol. 2* (New York: Harper & Row, Publishers), 'Capital, capitalist, capitalism,' pp. 231-249.
- Fisher, Irvin. 1896. What is Capital? *The Economic Journal* 6 (24, December): 509-534. [eResources]
- Keen, Steve. 2001. *Debunking Economics. The Naked Emperor of the Social Sciences*. Annandale and London: Pluto Press Australia and Zed Books. Ch. 6, 'The Holy War Over Capital,' pp. 129-147.
- OECD. 2001. *Measuring Capital. Measurement of Capital Stocks, Consumption of Fixed Capital and Capital Services*. OECD Manual. Paris: OECD Publication Services, www.oecd.org/pdf/M00009000/M00009324.pdf.
- Robinson, Joan. 1962. *Economic Philosophy*. Chicago: Aldine Pub. Co. Ch. 3, 'The Neo-Classics: Utility,' pp. 48-70.
- Robinson, J. (1971) 'The Relevance of Economic Theory,' in J. Schwartz, J. (ed.). (1977) *The Subtle Anatomy of Capitalism* (Santa Monika: Goodyear), pp. 16-21.
- Robinson, Joan. 1981. *What Are the Questions? and Other Essays*. Armonk, NY: M. E. Sharpe. 'Controversy' (pp. 96-140).
- Schumpeter, J.A. (1954) *History of Economic Analysis*, Ed. from manuscript by E.B. Schumpeter (New York: Oxford University Press), Section 6.5 'Capital', pp. 625-645.
- Sraffa, Pierro. 1960. *Production of Commodities by Means of Commodities. Prelude to a Critique of Economic Theory*. Cambridge: Cambridge University Press.

RESEARCH EXERCISES 1 AND 2

Purpose. The purpose of the exercises is threefold: (a) to familiarize you with some of the data sources available for the study of the political economy; (b) to give you hands-on experience in obtaining, manipulating and interpreting empirical information; and (c) to make you appreciate the importance and limitations of facts.

Work in pairs. Working with someone else is beneficial for a number of reasons. First, discussing and debating your ideas is a catalyst for the imagination. Second, it helps prevent panic when things don't work out. And, third, it gives me less to grade. If you nevertheless want to work alone, that's OK, but clear it with me first.

Start immediately. Things always take longer than you think. Attend one of the library instruction sessions (see schedule below), and start working on the first exercise.

Back up your work. Computers can be quick to eliminate any trace of your work if you are not careful. Make sure to save frequent backups.

Excel. There are no shortcuts here. You should familiarize yourself with this spread sheet programme, simply since it is the most widely used. If you know how to plot data in another programme, that's fine too.

Presentation. Pay very close attention to aesthetics. Write your answers with care, trying to be concise but precise. Type your answers and print your tables and charts neatly.

Library database instructions. I have arranged with Walter Giesbrecht of Scott Library to offer a basic instruction session to students in this seminar. The instruction will cover: (a) the World Bank's *World Development Indicators*, (b) the *International Statistical Yearbook* and (c) *Global Insight*. Two identical sessions will be given early in the term. You are required to attend one of them:

- Monday, Sep 19, 12:00-2:00 PM, Scott Library Room 530
- Wednesday, Sep 21, 12:00-2:00 PM, Scott Library Room 530

The session will help you get started with the first assignment. The librarians are also very helpful beyond the seminar. Don't be shy to seek help – with the databases as well as with other questions.

Exercise 1 (15%)

Due date. October 25, hard copy in class.

Data and presentation. This exercise uses World Bank's *World Development Indicators*; it requires you to use Microsoft Excel or a comparable charting programme.

Questions

- (75%) Using data from the World Bank's *World Development Indicators*, plot the 'General Government Final Consumption Expenditure (% of GDP)' for both the 'High Income countries' and the 'Low and Middle Income countries.' The data begin in 1960 and extend to the early 2000s (the World Bank constantly updates its data, so your own figure may include additional/modified observations). Using Excel to chart the result, try to make the figure as similar as you can to the one given below. You should hand in the Excel sheet of the graph with your answer.
- (25%) Using the data charted in your figure, assess the following statement: 'Since the early 1980s, the hallmark of neoliberalism was smaller government.' (Maximum 250 words).

NOTE: Cutoff point between Middle and High Income countries: \$9,385 Gross National Income per Capita.

SOURCE: *World Development Indicators* 2005.

Exercise 2 (25%)

Due date. November 15, hard copy in class.

Data and presentation. This exercise uses data that can be retrieved from *World Development Indicators*, the *International Statistical Yearbook* or *Global Insight* (you can use other sources if you wish). The exercise also requires you to use Excel or a comparable charting programme. Document your data sources and explain all your computations.

Questions

- (25%) The top part of the figure below compares two U.S. time series. One series is the 'real' hourly wage rate in private industry. The other series, also expressed in 'real' terms, is the sum of capital gains and dividends earned from investing in the S&P500 index. The bottom part of the figure computes a 'differential' index: the ratio between the nominal wage and the nominal capital gains and dividends. (a) Explain the difference between nominal and 'real' measures of income. (b) Explain the meaning of a 'differential' index and how it differs from 'real' measures of income. (c) What conclusions can you draw from the data in the figure? (up to 500 words).

NOTE: real series are computed by deflating nominal data by the CPI.

* Capital gains and dividends is the difference between successive values of the S&P500 Total Return Index.

SOURCE: U.S. Bureau of the Census through Global Insight; Global Financial Data (www.globalfindata.com)

2. (25%) Using time series data for a country of your choice (other than the United States), produce a chart similar to the one plotted on the previous page. The chart should compare the evolution of the 'real' wage rate to the evolution of 'real' gains from investing in the stock market (for the latter measure, you can use either the stock price index or the stock market total return index). The chart should also calculate the 'differential' ratio between the gains from investing in the stock market on the one hand, and the wage rate on the other. What conclusions can you draw from your computations? (up to 400 words).
3. (25%) Assess the following claim for a country of your choice: 'The rise of neoliberalism since the early 1980s has made [country X] more unstable.' Your answer should be based on the historical evolution of the following three variables, each plotted on a separate chart:
 - (a) the annual rate of growth of GDP (measured in 'real' terms, using quarterly data);
 - (b) the annual rate of growth of the country's stock market index (measured in 'real' terms, using monthly data); and
 - (c) the annual rate of change (appreciation/depreciation) of the exchange rate (measured relative to the \$US, using monthly data).

When using monthly data, compute the annual rate of growth by comparing each month to the same month the year before – i.e. November 2001 to November 2000, December 2001 relative to December 2000, etc. When using quarterly data, compare each quarter to the same quarter the year before; namely, second quarter 2001 to second quarter 2000, etc. Go back with the data as far as you can, so as to make the comparisons historically meaningful (up to 400 words).

4. (25%). For a corporation of your choice, obtain the following annual time-series data for at least 10 years: (a) net profit after taxes, and (b) sales revenues. Compute the time series for the corporation's markup (the ratio of net profit to sales revenues). Plot all three series on the same chart (profit and sales on the left axis, the markup on the right axis). Document the exact sources of your data, including variable names when appropriate. What is the main cause for the change in profit – changes in sales or changes in the markup? What conclusion can you draw from this answer? (up to 400 words).

TERM PAPER (50%)

Due date. December 15 (a Word file – not PDF -- emailed as an attachment to nitzan@yorku.ca).

Instructions. Write an essay on one of the topics listed below. Your paper should provide a thoughtful theoretical examination of the issue, backed by empirical evidence. The theoretical arguments should draw on the course material and readings (required and optional); you are encouraged (but not obliged) to use additional sources. The empirical evidence could draw on secondary sources, but it must also contain your own data analysis using the skills acquired in the course. The listed topics are very broad. This generality gives you considerable flexibility; but it also means that you have to carefully – and explicitly – narrow down your question/topic to make it manageable.

The paper must be emailed to me by December 15 as a single Word attachment. Make sure this single attachment includes all text and graphics (insert graphics by using “paste special” → “as picture”; this pasting will reduce the file size). The paper should not be longer than 4,000 words of text (including references and notes), plus charts and tables. Longer papers will not be accepted.

How to write the paper. Your ingenuity and in-depth understanding will be lost unless expressed clearly. Pay attention to the structure of the essay, writing style, grammar and presentation: (a) in your introduction, specify clearly the purpose, hypothesis and method of your paper; (b) make sure you deliver on what you promise; and (c) re-read and re-edit your paper several times before handing it in.

Topics

1. ‘Capital has become the most important form of politics, both domestically and globally.’ Write an essay articulating your agreement or disagreement with the above statement.
2. ‘The late 1990s were a bubble economy, in which financial markets were increasingly de-linked from the real world.’ Discuss critically the logic and empirical bases of this statement.
3. Who rule the corporation, how do they rule it, and why does it matter? Assess these questions theoretically and empirically.
4. ‘Money and finance are essentially mechanisms of intermediation. They help the real economy function, but have little impact on the final outcomes themselves.’ Critically assess the theoretical debates and historical evidence pertaining to this statement.
5. Examine the political economy of privatization in a country of your choice. What were the causes? Who benefited, who lost and how? What were the broader ramifications for society? (Some interesting countries to look at: Argentina, Brazil, China, Israel and Russia, among others.)
6. During the Apartheid era, South African capital was subject to capital controls. Most of these controls were lifted during the 1990s. Assess the impact of this change on the political economy of the country.
7. ‘A growing proportion of financial assets is owned by workers through pension funds. If this trend continues, the basic conflict between capital and labour will eventually be eliminated.’ Do you agree with the first part of this statement? Do you agree with its conclusion?

8. 'Real investment brings growth and prosperity, whereas financial investment is fictitious and wasteful. Capitalist prosperity therefore depends encouraging the former and restricting the latter.' Assess the validity of this claim in light of the theoretical and empirical connection between capitalist production and capitalist ownership.
9. Is 'economics' a science or is it an ideology? Discuss from at least two different perspectives.
10. Can 'capital' be measured? Discuss from three different perspectives.
11. Compare and contrast the fundamental assumptions of the 'utility,' 'labour value' and 'power' theories of capital.
12. 'Capital accumulation requires a state.' Assess this statement theoretically and empirically.
13. Over the past fifty years, economic growth in the industrial countries has trended downward. Explain this process from the perspective of at least two theories of capital accumulation.
14. Since the 1940s, the developed countries have experienced uninterrupted inflation. Was this inflation 'good' or 'bad' for capital accumulation? Discuss from the viewpoint of at least two different theories of accumulation.
15. Where does the 'normal rate of return' come from? Answer this question from two theoretical viewpoints and, if possible, support your answers with empirical evidence.
16. Using charts, examine the long term correlation between inflation and growth in 3 countries of your choice. How are your findings related to the process of capital accumulation?
17. Examine the effects of 'globalization' on capital accumulation in a country of your choice.
18. Write a paper that analyses, empirically and/or theoretically, the relationship between power and accumulation in a country of your choice.
19. Examine, theoretically and/or empirically, the process of corporate centralization in a sector or a country of your choice.
20. Is contemporary capitalism 'imperialist'? Examine this question analytically and empirically.
21. 'The new wars of the 21st century are necessary for capital accumulation.' Using theory and empirical evidence, explain why you agree or disagree.
22. Is knowledge a 'factor of production'? How do intellectual property rights affect the process of capital accumulation? Examine these questions analytically and empirically.
23. 'The environment is a public 'externality'; privatizing it will boost the accumulation of capital.' Assess the theoretical and empirical validity of this statement.
24. Examine the underlying political economy of accumulation for a particular corporation or group of corporations.
