

# Global Capital

## *Political Economy of Capitalist Power*

York University, Political Science 6285 (0.3)  
Fall, September 9 – December 6, 2013, Tuesday 11:30-14:30

**Course Director: Jonathan Nitzan**

Office: S650 · Office hours: Tuesday 3:30-4:30, or by appointment  
Voice: 736-2100 (ext. 88822) · E-mail: [nitzan@yorku.ca](mailto:nitzan@yorku.ca) · Website: [www.bnarchives.net](http://www.bnarchives.net)

### OVERVIEW

#### **Description**

*What is capital?* Despite centuries of debate, there is no clear answer to this question – and for a good reason. Capital is a polemic term. The way we define it attests our theoretical biases, ideological disposition, view of politics, class consciousness, social position, and more.

Is capital the same as machines, or is it merely a financial asset? Is it a material article or a social process? Is it a static substance or a dynamic entity? The form of capital, its existence as monetary wealth, is hardly in doubt. The problem is with the content, the stuff that makes capital grow – and on this issue there is no agreement whatsoever. For example, does capital accumulate because it is productive, or due to the exploitation of workers? Does capital expand from within capitalism, or does it need non-capitalist institutions like the state and other ‘external’ forces? Is accumulation synonymous with economic growth, or can capital expand by damaging production and undermining efficiency? What exactly is being accumulated? Does the value of capital represent utility, abstract labour – or perhaps something totally different, such as power or force? What units should we use to measure its accumulation?

Surprisingly, these questions remain unanswered; in fact, with the victory of liberalism, most of them are no longer being asked. But the silence cannot last for long. As crisis and social strife intensify, the questions are bound to resurface. The accumulation of capital is the central process of capitalism, and unless we can clarify what that process means, we’ll remain unable to understand our world, let alone change it.

The seminar has two related goals: substantive and pedagogical. The substantive purpose is to tackle the question of capital head on. The course explores a spectrum of liberal and Marxist theories, ideologies and dogmas – as well as a radical alternative to these views. The argument is developed theoretically, historically and empirically. The first part of the seminar provides a critical overview of political economy, examining its historical emergence, triumph and eventual demise. The second part deals with the two ‘materialistic’ schools of capital – the liberal theory of utility and the Marxist theory of labour time – dissecting their structure, strengths and limitations. The third part brings power back in: it analyses the relation between accumulation and sabotage, studies the institutions of the corporation and the state and introduces a new framework – the capitalist mode of power. The final part offers an alternative approach – the theory of capital as power – and illustrates how this approach can shed light on conflict-ridden processes such as corporate merger, stagflation, imperialism and the new wars of the twenty-first century.

Pedagogically, the seminar seeks to prepare students toward conducting their own independent research. Students are introduced to various electronic data sources, instructed in different methods of analysis and tutored in developing their empirical research skills. As the seminar progresses, these skills are used both to assess various theories and to develop the students’ own theoretical/empirical research projects.

## Format

Seminar lectures and class discussion.

## Evaluation

Your course evaluation is based on the items listed in the table below. If you submit all the course work, your final grade will be the higher of Scheme A and B. If you fail to submit one or more of the listed items, your grade will be calculated on the basis of Scheme A.

|                     | Scheme A | Scheme B | Maximum length | Due Date         |
|---------------------|----------|----------|----------------|------------------|
| Participation       | 10%      | 10%      | —              |                  |
| Research Exercise 1 | 15%      | 0        | —              | Tue, October 22  |
| Research Exercise 2 | 15%      | 0        | —              | Tue, November 12 |
| Paper Proposal      | 10%      | 10%      |                | Tue, November 26 |
| Term Paper          | 50%      | 80%      | 6,000 words    | Fri, December 30 |

- **Participation.** Regular attendance and reading the assigned material before class are pre-requisites for effective participation.
- **Research Exercises.** The two research exercises are to be done in pairs. The purpose of the exercises is threefold: (a) to familiarize you with some of the data sources available for the study of political economy; (b) to give you hands-on experience in obtaining, manipulating and interpreting empirical information; and (c) to make you appreciate the importance and limitations of facts.
- **Term Paper: Short Proposal.** Students are asked to write a research paper on a topic of their choice relevant to the seminar. The paper could be: (1) a critical appraisal of one or more aspects of the literature; (2) an empirical study, preferably in reference to a theoretical debate; or (3) a more ambitious attempt to formulate and assess your own hypothesis or theory. In preparation for this research, you are asked to draft a proposal consisting of three paragraphs: (1) the question you seek to answer; (2) the possible answers to that question; and (3) the research methodology you will use to answer the question. This brief proposal is not easy to write, but writing it properly should greatly facilitate the research and writing of the paper itself. The proposal should be no longer than 500 words and should be emailed to me as a Word attachment (send to [nitzan@yorku.ca](mailto:nitzan@yorku.ca)).
- **Term paper: Final Draft.** The paper itself must not exceed 6,000 words, including footnotes and references but excluding charts and tables. Note: your ingenuity and in-depth understanding will be lost unless they are clearly expressed, so pay close attention to the structure of the essay, writing style, grammar and presentation. Three useful suggestions: (1) in your introduction, specify clearly the purpose, hypothesis and method of your paper; (2) make sure you deliver on what you promise; and (3) re-read and re-edit your paper several times before handing it in. Email the paper as a Word attachment (send to [nitzan@yorku.ca](mailto:nitzan@yorku.ca)).

A NOTE ON PROGRESSION: The assignments and paper do not assume any prior experience in doing empirical work. Consequently, these works are structured to develop your capacity in stages. In the first step (Research Exercise 1) you are asked merely to replicate an existing empirical work, so that

you can familiarize yourself with the data sources and with Excel. Building on this knowledge, the second step (Research Exercise 2) instructs you to empirically research and answer a series of questions. And in the third step (Term Paper), when you are finally standing on your own feet, your task is to both ask the questions and research the answers. Having gone through these three steps, you should be able to conduct your own independent research and further develop your capabilities.

### Required Texts (available at the bookstore)

- Baumohl, Bernard. 2012. *The Secrets of Economic Indicators. Hidden Clues to Future Economic Trends and Investment Opportunities*. 3rd ed. Upper Saddle River, N.J.: FT Press.
- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press.
- Ganshof, François Louis. 1964. [1996]. *Feudalism*. The Medieval Academy Reprints for Teaching. Translated by P. Grierson. 3rd English ed. Toronto: University of Toronto Press, Scholarly Publishing Division.
- Heilbroner, Robert. 1992. *Twenty-First Century Capitalism*. Routledge.
- Nitzan, Jonathan, and Shimshon Bichler. 2009. *Capital as Power. A Study of Order and Creorder*. RIPE Series in Global Political Economy. New York and London: Routledge. [Free PDF: <http://bnarchives.yorku.ca/259/>.]
- Veblen, Thorstein. 1923. [1967]. *Absentee Ownership and Business Enterprise in Recent Times. The Case of America*. With an introduction by Robert Leckachman. Boston: Beacon Press.

### Recommended Texts (some are available at the bookstore)

### SCHEDULE

*Sep 9* Introduction and Organization

#### **Dilemmas of Political Economy**

1. *Sep 16:* The Rise and Demise of Political Economy

#### **The Enigma of Capital**

2. *Sep 23:* Neoclassical Theories of Capital: Utility
3. *Sep 30:* Marxist Theories of Capital: Labour

#### **Bringing Power Back In**

4. *Oct 7:* Accumulation and Sabotage
5. *Oct 14:* Organs of Capital: Corporations and Governments
6. *Oct 21:* Modes of Power: Ancient, Feudal, Capitalist

#### **Accumulation of Power**

7. *Oct 28:* Dominant Capital & Differential Accumulation
8. *Nov 4:* Breadth: Greenfield, Mergers & Globalization
9. *Nov 11:* Depth: Cost Cutting and Stagflation
10. *Nov 18:* Regimes of Accumulation: Theory and History
11. *Nov 25:* Regimes of Accumulation: Theory and History
12. *Dec 2:* Systemic Crisis and the Asymptotes of Power

## READINGS

### Introduction and Organization

#### Useful Overviews

- Heilbroner, Robert. 1992. *Twenty-First Century Capitalism*. Toronto: Anansi. [required textbook]
- Bichler, Shimshon, and Jonathan Nitzan. 2011. *Differential Accumulation*. Monograph, Jerusalem and Montreal (December), pp. 1-13. [<http://bnarchives.yorku.ca/323/>]

### 1. The Rise and Demise of Political Economy

#### *Required Readings*

- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press, 'Introduction' and Ch. 1: 'Politics and Economics,' pp. 1-32. [required textbook; 32 pages]
- Wallerstein, Immanuel Maurice. 2004. *World-Systems Analysis. An Introduction*. Durham: Duke University Press, Ch.1: 'Historical Origins of World-Systems Analysis. From Social Disciplines to Historical Social Sciences,' pp. 1-22. [Moodle; 22 pages]
- Nitzan, Jonathan, and Shimshon Bichler. 2009. *Capital as Power. A Study of Order and Creorder*. RIPE Series in Global Political Economy. New York and London: Routledge, Part I, 'Dilemmas of Political Economy,' pp. 1-63 [required textbook; 63 pages]
- Bichler, Shimshon, and Jonathan Nitzan. 2012. *Capital as Power: Toward a New Cosmology of Capitalism*. *Real-World Economics Review* (61, September): 65-84. [<http://bnarchives.yorku.ca/343/>; 20 pages]

#### *Novels (optional)*

- Céline, Louis-Ferdinand. 1932. [1983]. *Journey to the End of the Night*. Translated by R. Manheim. np: New Directions.
- Houellebecq, Michel. 2000. *The Elementary Particles*. Translated from the French by Frank Wynne. New York: Knopf.

#### *Additional Bibliography (optional)*

- Diamond, Jared M. 1999. *Guns, Germs, and Steel. The Fate of Human Societies*. New York: W.W. Norton & Co.
- Dowd, Douglas. 2000. *Capitalism and Its Economics: A Critical History*. London and Sterling, Virginia: Pluto Press.
- Heilbroner, Robert. 1980. *The Worldly Philosophers. The Lives, Times, and Ideas of the Great Economic Thinkers*. Fifth ed. New York: Simon and Schuster.
- Huberman, Leo. 1936. [1961]. *Man's Worldly Goods. The Story of the Wealth of Nations*. New York: Monthly Review Press.
- Josephson, Matthew. 1934. *The Robber Barons. The Great American Capitalists. 1861-1901*. New York: Harcourt, Brace and Company.

## 2. Neoclassical Theories of Capital: Utility

### Required Readings

- Caporaso, James A., and David P. Levine. 1992. *Theories of Political Economy*. Cambridge: Cambridge University Press, Ch. 4: 'Neoclassical Political Economy,' pp. 77-99. [required textbook; 23 pages]
- Hunt, E.K. (1992) *History of Economic Thought. A Critical Perspective* (New York: HaperCollins Publishers), Ch. 11, 'Neoclassical Theories of the Firm and Income Distribution: The Writings of Marshall, Clark and Böhm-Bawerk'; Ch. 16, 'Annulment of the Myth of the Measurable Productivity of Capital: The Writings of Sraffa,' pp. 286-315; 434-458. [Moodle; 55 pages]
- Arnsperger, Christian, and Yanis Varoufakis. 2006. What Is Neoclassical Economics? The Three Axioms Responsible for its Theoretical Oeuvre, Practical Irrelevance and, thus, Discursive Power. *Post-Autistic Economics* (38, July).  
<http://www.paecon.net/PAEReview/issue38/ArnspergerVaroufakis38.htm>.
- Nitzan, Jonathan, and Shimshon Bichler. 2009. *Capital as Power. A Study of Order and Creorder*. RIPE Series in Global Political Economy. New York and London: Routledge, Ch. 5, 'Neoclassical Parables,' pp. 67-83 [required textbook; 17 pages]

### Novels and films (optional)

- Huxley, Aldous. 1932. *Brave New World*. With a special Forward by the author. New York: The Modern Library.
- Huxley, Aldous. 1962. *Island. A Novel*. 1st ed. New York: Harper.
- Curtis, Adam, 2002, *The Century of the Self*, BBC TV series.

### Additional Bibliography (optional)

## 12. Systemic Crisis and the Asymptotes of Power

### Required Readings

- Bichler, Shimshon, and Jonathan Nitzan. 2010. Systemic Fear, Modern Finance and the Future of Capitalism. Monograph, Jerusalem and Montreal (July), pp. 1-42. [<http://bnarchives.yorku.ca/289/>]
- Kliman, Andrew, Shimshon Bichler, and Jonathan Nitzan. 2011. Systemic Crisis, Systemic Fear: An Exchange. Special Issue on 'Crisis'. *Journal of Critical Globalization Studies* (4, April): 61-118. [<http://bnarchives.yorku.ca/314/>]
- Bichler, Shimshon, and Jonathan Nitzan. 2012. The Asymptotes of Power. *Real-World Economics Review* (60, June): 18-53. [<http://bnarchives.yorku.ca/336/>]

### **RESEARCH EXERCISES 1 AND 2**

**Purpose.** The purpose of the exercises is threefold: (a) to familiarize you with some of the data sources available for the study of the political economy; (b) to give you hands-on experience in obtaining, manipulating and interpreting empirical information; and (c) to make you appreciate the importance and limitations of facts.

**Work in pairs.** Working with someone else is beneficial for a number of reasons. First, it encourages discussion and debate and entices the imagination. Second, it helps prevent panic when things don't work out. And, third, it gives me less to grade. If you insist on working alone, that's OK, but clear it with me first.

**Start immediately.** Things always take longer than you think. Attend one of the library instruction sessions (see schedule below) and start working on the first exercise.

**Back up your work.** Computers can be quick to eliminate any trace of your work if you are not careful. Make sure to save frequent backups.

**Excel.** There are no shortcuts here. You should familiarize yourself with this spread sheet programme, simply since it is the most widely used. If you know how to plot data in another programme, that's fine too.

**Presentation.** Pay very close attention to aesthetics. Write your answers with care, trying to be concise but precise. Type your answers and print your tables and charts neatly.

**Library database instructions.** I have arranged with Walter Giesbrecht of Scott Library (walterg@yorku.ca) to offer a basic instruction session to students in this seminar. The instruction will cover: (a) the World Bank's *World Development Indicators*, (b) *Global Insight* and (c) *Global Financial Data*. Two identical sessions will be given early in the term. You are required to attend one of them:

- Session I: Wed, September 18, 2013, 17:00-18:30, Scott Library, Instruction Room 531.
- Session II: Tue, September 24, 2012, 17:00-18:30, Scott Library, Instruction Room 531

The session will help you get started with the first assignment. The librarians are also very helpful beyond the seminar. Don't be shy to seek help – with the databases as well as with other questions. The library resource page for this course could be found here:

<http://researchguides.library.yorku.ca/nitzan>

**Exercise 1 (15%)**

**Due date.** October 22, hard copy in class.

**Data and presentation.** This exercise uses the World Bank's *World Development Indicators*; it requires you to use Microsoft Excel or a comparable charting programme.

**Questions**

- (75%) Using data from the World Bank's *World Development Indicators*, plot the 'General Government Final Consumption Expenditure (% of GDP)' for both the 'High Income countries' and the 'Low and Middle Income countries.' The data begin in 1960 and extend to the early 2010s (the World Bank constantly updates its data, so your own figure may include additional/modified observations). Using Excel to chart the result, try to make your figure look exactly as the one given below (including chart proportions, font size, line style, etc.). You should hand in the Excel sheet of the graph with your answer.
- (25%) Using the data charted in your figure, assess the following statement: 'Since the early 1980s, the hallmark of neo-liberalism was smaller government.' Differentiate between the experience of high income countries on the one hand and low and middle income countries on the other (Maximum 250 words).

**General Government Final Consumption Expenditure  
(% of GDP)**

NOTE: Cutoff point between Middle and High Income countries: \$12,475 Gross National Income per Capita in 2011 (using the World Bank Atlas Method).  
(<http://data.worldbank.org/about/country-classifications>)

SOURCE: *World Development Indicators*, Online, 2013

**Exercise 2 (25%)**

**Due date.** November 12, hard copy in class.

**Data and presentation.** This exercise uses data that can be retrieved from *World Development Indicators*, *Global Financial Data*, *Global Insight* and *Mergent* (you can also use other sources if you wish). The exercise also requires you to use Excel or a comparable charting programme. Document your data, including the sources and variable names, and explain all your computations.

**Questions (review the figure and turn to the next page)**

NOTE: Real series are computed by dividing the nominal series by the CPI.

SOURCE: The S&P total return index is from Global Financial Data (till 1969) spliced with data from Global Insight (1970 onward, series code: SP500TRI). The hourly wage rate is constructed by splicing the following series. *Historical Statistics of the United States*, Millennial Edition Online: Ba4290 (hourly wages in manufacturing, all trades, 1865-1889), Ba4299 (hourly earnings in manufacturing, all industries, 1890-1913), Ba4362 (weekly earnings of production workers in manufacturing, 1914-1918), Ba4361 (hourly earnings of production workers in manufacturing, 1919-1938); Global Insight: AHPMFNS (average hourly earnings of production workers in manufacturing, 1939-2011). The CPI is from Global Financial Data (till 1946) spliced with Global Insight (1947 onward, series code: CPIU).

1. (25%; up to 500 words) The top part of the figure on page 21 compares two U.S. time series, each expressed as a 10-year moving average. One is a 'flow' series: the 'real' hourly wage rate in manufacturing. The other is a 'stock' series, also expressed in 'real' terms: the total return index of the S&P500 group of companies (the 'total' indicates that stock prices are augmented by reinvested dividends). The bottom part of the figure computes a 'differential' index: the ratio between the nominal total return index and the nominal wage rate (also expressed as a 10-year moving average). Answer the following questions:
  - a. Explain the difference between 'stock' and 'flow' data.
  - b. Explain the difference between nominal and 'real' measures.
  - c. Explain the meaning of a differential index and how it differs from 'real' measures.
  - d. What conclusions can you draw from the data in the figure?
  
2. (25%; up to 400 words) A good data source for this question is the IMF's *International Financial Statistics* databank available through Global Insight. Using time series data for a country of your choice (other than the United States), produce a chart similar to the one plotted on page 21. The chart should compare the evolution of the 'real' wage rate to the evolution of the 'real' total return from investing in the stock market (you can use the 'real' stock market index if you cannot find the total return index). The chart should also calculate the 'differential' ratio between the total return index of the stock market and the wage rate. What conclusions can you draw from your computations? (up to 400 words).
  
3. (25%; up to 400 words) Consider the figure on page 23. The chart shows the rate of growth of U.S. 'real' GDP (GDP measured in constant prices). It uses quarterly data, with each observation showing the annual per cent change from the same quarter in the previous year (e.g. Q1 1998 relative to Q1 1997, Q2 1998 relative to Q2 1997, etc.).
  - a. Use *Global Financial Data* (GFD) to obtain quarterly data for the 'real' GDP of a country other than the United States. You must choose a country whose quarterly 'real' GDP data begin in 1960 or earlier (note that GFD's quarterly data may go back only so far, and that for earlier year it reports only annual data; these annual data have to be deleted from your dataset for the purpose of the presentation here). Calculate the annual growth rate of the country's 'real' GDP and plot it similarly to the figure on page 23.
  
  - b. Based on the growth rates of the U.S. and the country you have chosen, assess the following statement: 'The rise of neoliberalism since the early 1980s has made the two countries more unstable'.
  
4. (25%; up to 400 words). Use *Mergent* to obtain the following annual time-series for a corporation of your choice: (a) net income (profit after taxes), and (b) sales revenues. Both series have to go back for at least 10 years. Using these data, compute the times series for the corporation's markup (the ratio of net profit to sales revenues). Plot all three series on the same chart (net income and sales on the left axis, the markup on the right axis; use a log scale if needed). Document the exact sources of your data, including variable names when appropriate (try to quantify your answer by assessing the relative deviations of each variable). What is the main cause for the change in profit – changes in sales or changes in the markup? What conclusion can you draw from this answer?

NOTE: The figure shows quarterly data. 'Real' GDP is expressed in constant 2005 dollars. The year-on-year rate of growth is computed between the same quarters in adjacent years. The last data point is for 2013:Q1

SOURCE: Global Financial Data (series code: GDPCUSA).
